Experience

Indeed, Product Operations Analyst

April 2022 - Present

- Researched and analyzed cases in Indeed's Product/Job-seeker team, ensuring clients products are in accordance with Indeed's policies.
- Operated with various internal tools and software including Salesforce, JIRA, Google Workspace, IQL, Workbench, Waldo etc to perform daily tasks and research.
- Worked closely and communicated with team leads on various projects, quickly gaining a deeper understanding of Indeed's internal tools and policies.

Whole Foods Market, Data Operations Specialist

Sep 2021 - Jan 2022

- Succeeded in helping the team tackle massive project near deadline and exceeded in the role of organizing the flow of recipe and nutrition data between regional and global databases
- Managed high volume of nutrition data of the global Whole Foods Market from day to day tasks such as analyzing, creating, updating, migrating and deletion of data in the database
- Acknowledged by senior team members for excellent attention to detail and accuracy when managing nutrition data between databases

Projects

Apple Event Analysis - <https://bit.ly/3KWpDMF>

- Planned and executed an exploratory analysis of the September Apple event, comparing Apple's keynote product announcement to twitter's live reaction using NLP
- Formulated the entire process from mining and wrangling to exploring the data and eventually featuring engineering to identify trends and insights from the event
- Designed an informative visual illustration summing up the results of the analysis using Canva for easier consumption of the data and its findings

Technologies

- Languages Python (Jupyter Notebook), SQL, JavaScript
- Visualization Tableau, Power BI, Excel, Matplotlib
- Database PostgreSQL, Amazon Web Services, Spark

Education

University of Texas at Austin

Feb 2021 - Aug 2021

- Data Analysis and Visualization BootCamp

- OOP in Python, Statistics, Databases, Big Data & Machine Learning

Austin Community College
